PROBLEM STATEMENT:

There are multiple news sharing apps used by a single user and are often spammed with notifications which cause users to miss important events across the Globe. A news sharing app wants to help users find relevant and important news easily every day. Generally, news is an essential one where every person can know what's happening all over the world. Long days ago, news can be viewed only through televisions and heard using radios. To make everyone's time and work easier it came into evolution as an application named "NEWS TRACKING APPLICATION" in which we can read or hear news wherever and whenever we want.

EMPATHY MAP:

SAYS

Don't know how to use this feature of the application?

Is this application was user friendly?

I don't need any irrelevent content

I was expecting something different from this application

THINKS

Too many ads in this application

May be this isn't best app for news tracking?

Am I getting the updated and genuine news through this app?

Why this app takes too much time?

JOHN (CUSTOMER)

DOES

Refreshed the page to make it load

Research and tries new features

Checkout reviews about the apllication

Use this application frequently and shares his/her experience with their collegues

FEELS

Feels over-whelmed by the news provided by the application

Excited to watch some funny content

Some Repeated content

Unsure who to trust/whether the news is real
